response to cytokine

positive regulation of cellular component movement

angiogenesis

cardiovascular system development

blood vessel morphogenesis

tube morphogenesis

vasculature development

blood vessel development

mitochondrion organization

nucleotide metabolic process cellular response to cytokine stimulus oxidation-reduction process nucleoside phosphate metabolic process

nucleobase-containing small-molecule metabolic process

drug metabolic process

carboxylic acid metabolic process

organic acid metabolic process

oxoacid metabolic process

ion transmembrane transport

enzyme linked receptor protein signaling pathway

positive regulation of locomotion

regulation of cell migration

regulation of cell adhesion

positive regulation of cell migration

positive regulation of cell motility
